

# **WEB APPLICATION DEVELOPMENT**

**ROLL NO:** 25075A1203

**AIM: WEEK-3:** Use JavaScript for doing client – side validation of the pages implemented in experiment 1 and experiment 2

**TITLE:** Food Express – Responsive Shopping Cart Web Application

## **PROJECT DESCRIPTION:**

Food Express is a responsive food ordering web application developed using **HTML5 and CSS3, and JavaScript.**

The application provides basic food ordering functionalities such as user home, login, registration, food catalog display, and shopping cart interface.

The project mainly focuses on creating a clean, user-friendly interface and achieving responsiveness using modern web design practices.

## **TECHNOLOGIES USED:**

- HTML5
- CSS3
- JavaScript

## **FEATURES OF THE APPLICATION:**

- User Home page
- User Login page
- User Registration Page
- Food Menu Catalog
- Shopping Cart Interface
- Responsive Layout
- Clean and attractive UI design

## **FILE STRUCTURE:**

WEEK3/

- |— index.html    -Home page
- |— login.html    -Login page
- |— register.html -Registration page
- |— catalog.html -Product Catalog page
- |— cart.html     -Shopping Cart page
- |— style.css     - Common stylesheet for all pages
- |— script.js     - JavaScript file for cart and validation
- |
- |— images/
- |    |— biryani.jpg
- |    |— pizza.jpg
- |    |— pasta.jpg
- |    |— noodles.jpg
- |    |— burger.jpg
- |    |— grilled sandwich.jpg
- |    |— French fries.jpg
- |    |— cheese cake.jpg
- |    |— icecream.jpg
- |    |— coke.jpg
- |
- |— screenshots/
- |    |— homepage3.jpg
- |    |— loginpage3.jpg
- |    |— registerpage3.jpg
- |    |— menu page3.1.jpg
- |    |— menu page3.2 .jpg
- |    |— cart page3 .jpg

## **DESCRIPTION OF EACH FILE:**

### **index.html – Home Page**

- Displays welcome screen for Food Express
- Provides navigation to Login and Register pages
- Contains an attractive UI with buttons and icons

### **login.html – Login Page**

- Represents the login page of the Food Express application
- Allows users to enter email and password for authentication
- Includes a navigation bar with logout option
- Contains a centered card layout

### **register.html – Registration Page**

- Used for creating a new user account
- Contains input fields for name, email, and password
- Includes a register button to submit user details
- Uses centered layout for better UI

### **catalog.html – Food Menu Page**

- Displays available food items for ordering
- Shows food images, names, and prices
- Uses grid layout to arrange items in a responsive manner
- Provides navigation links for Menu, Cart, and Logout

### **cart.html – Shopping Cart Page**

- Displays selected food items added to the cart
- Shows product details such as name and price and quantity
- Displays total amount of selected items
- Includes Checkout button

### style.css – Stylesheet

- Contains common styling for all web pages
- Includes responsive layouts for various screen sizes
- Styles navigation, hero section, cards, catalog items, and cart items

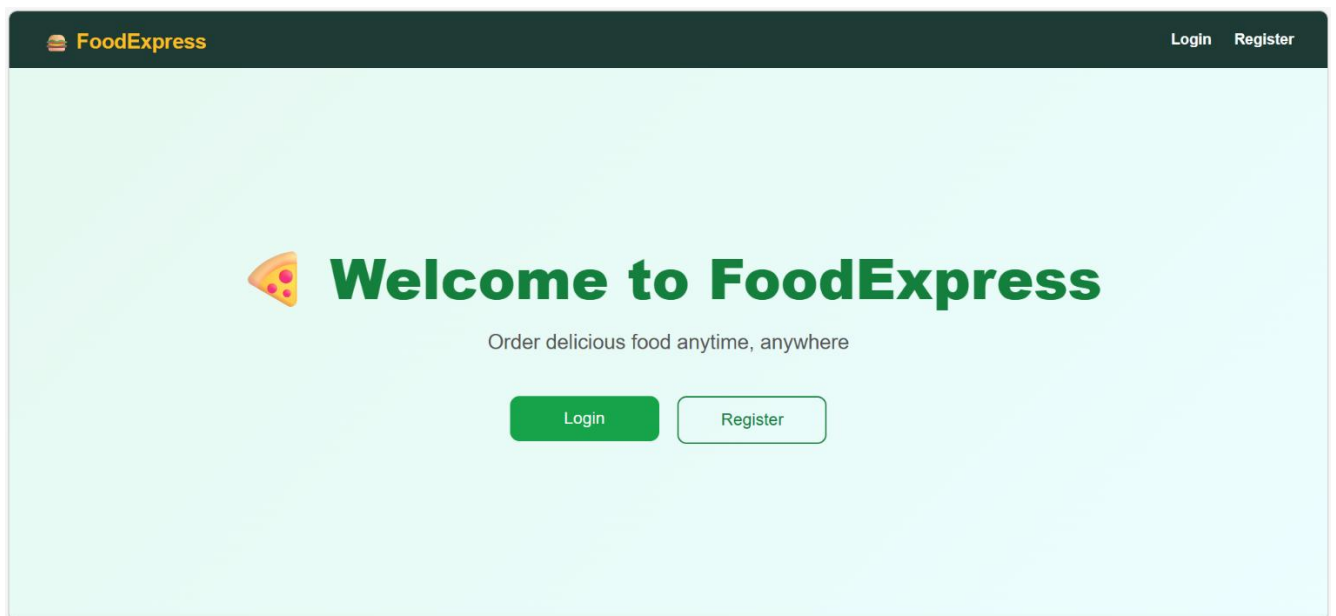

### Script.js – JavaScript File

- Handles cart functionality using localStorage
- Adds items to cart and updates quantities
- Validates user inputs for forms

## SCREENSHOTS OF OUTPUTS WITH DESCRIPTION:

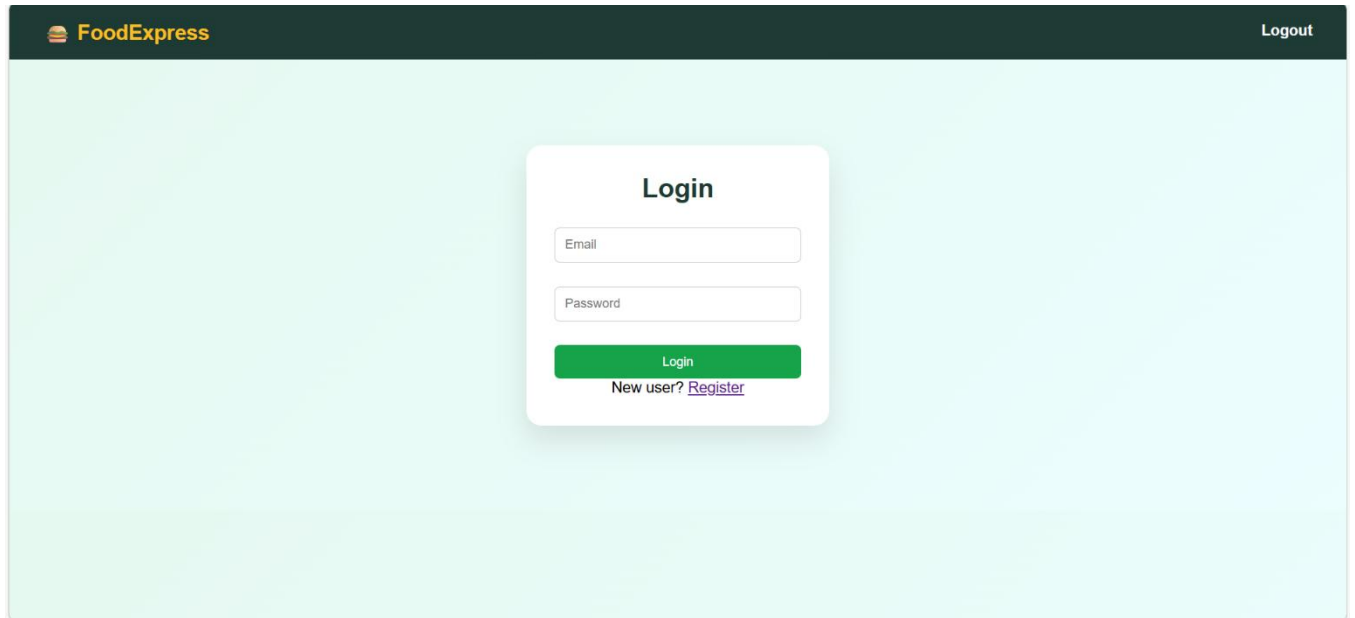

### 1.index.html

- Shows the Food Express welcome screen.
- Provides Login and Register navigation buttons

## 2.login.html

- Displays the login form with email and password fields
- Shows a centered card layout

FoodExpress Logout

### Login

Email

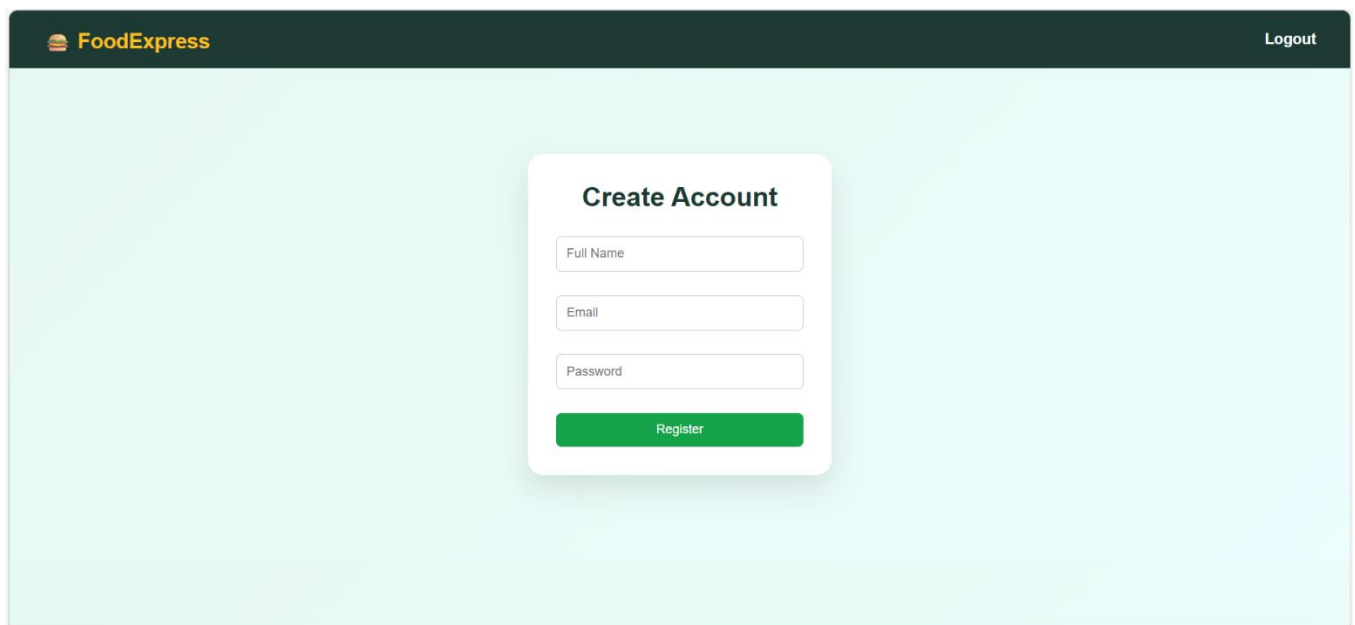

Password

Login

New user? [Register](#)

## 3.register.html

- Used for new user account creation
- Displays a centered registration form

FoodExpress Logout

### Create Account

Full Name

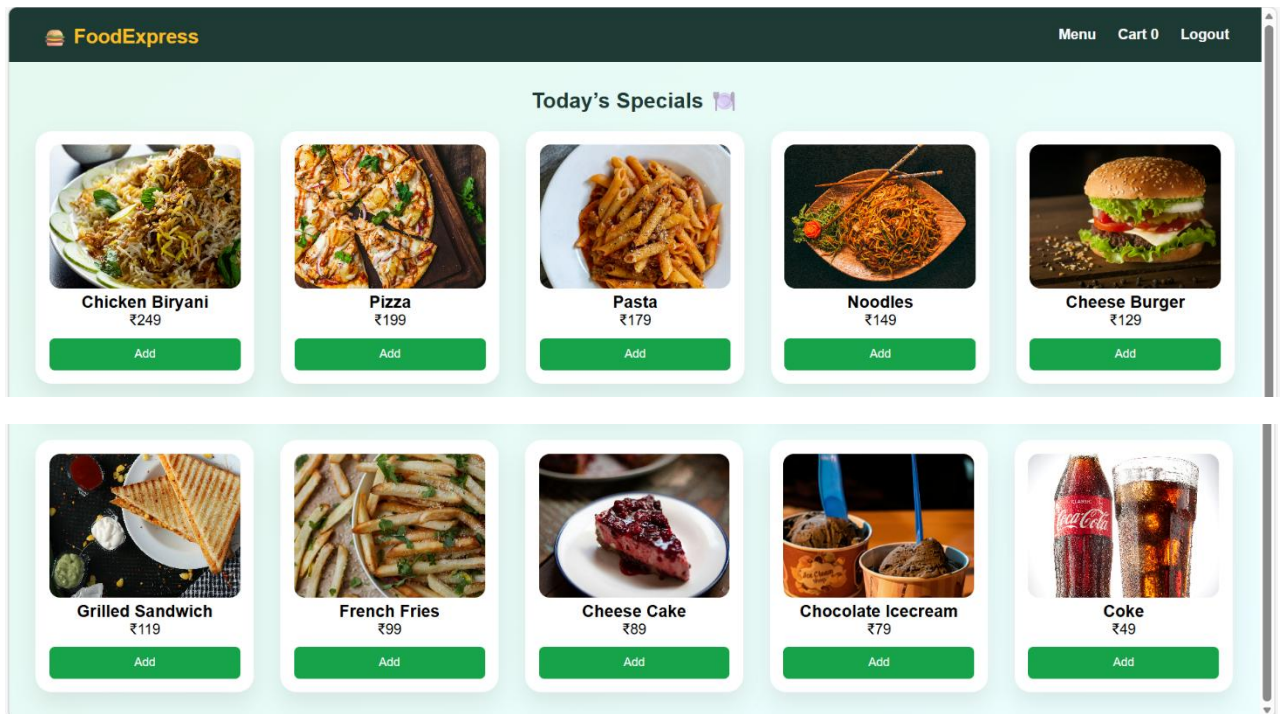

Email

Password

Register

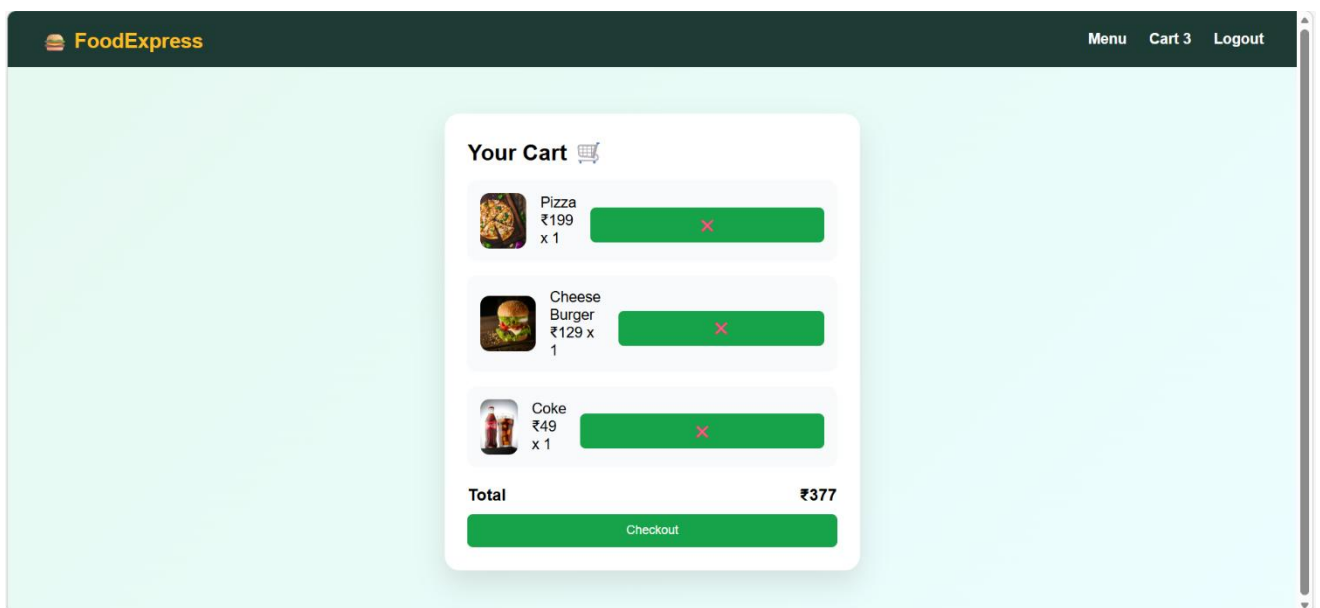

## 4.catalog.html

- Displays food items with images and prices
- Shows Add buttons for each food item

## 5.cart.html

- Shows selected food items and total amount
- Includes Checkout button

## **SOURCES USED FOR HELP:**

- MDN Web Docs – HTML and CSS references
- W3Schools – Forms, navigation bars, and layout examples
- JavaScript Documentation – LocalStorage and DOM manipulation
- Unsplash – Free images for food catalog
- LLM (ChatGPT) – Debugging code and improving layout

## **CONCLUSION:**

The FoodExpress application was successfully developed with a clean, responsive design using HTML5, CSS3, and JavaScript.
